COMPANY PROFILE

CLASSIC SHOP CHINA LTD

Your Trusted Partner in Rotary Die Solutions

Company Overview

Company Name	Classic Shop China LTD
Type	100% Import Manufacturer
Founded	Bangladesh
Industry	Rotary Die Manufacturing
Headquarters	House 2 & 4, Road 9 Avenue, Sector 16/E, Uttora Dhaka 1230
Phone	+880 1711-778104
Email	info@classicrotarydie.com
Website	www.classicrotarydie.com
Market Focus	Local & Global — Export to Multiple Countries
Specialization	Manufacturing of Rotary Dies, Flat Dies, Advanced Laser Cutting Solutions, IKEA Glue (Industrial- Grade Adhesives), Printing Inks & Related Accessories.

Executive Summary

Classic Shop China LTD is a premier Bangladeshi manufacturer and exporter specializing in high-precision rotary die solutions. Established as a trusted partner for both small enterprises and large-scale production facilities, the company delivers world-class cutting, lamination, and packaging solutions to a global clientele.

With a cutting-edge manufacturing facility, a team of highly skilled professionals, and an unwavering commitment to quality, Classic Shop China LTD consistently delivers on-time products that meet international standards. The company serves diverse industries including packaging, labeling, garments accessories, and more.

Whether you require standardized die-cutting equipment or fully customized solutions designed to your exact specifications, Classic Shop China LTD has the expertise, technology, and capacity to exceed your expectations at every stage.

About Classicrotary Die

Classic Shop China LTD is a trusted 100% import-export manufacturer proudly serving local and global clients from its state-of-the-art facility in Durgapur, Ashulia, Savar, Dhaka, Bangladesh. The company has been pioneering in the manufacturing of rotary dies and associated products, earning a strong reputation for precision, durability, and reliability across international markets.

Rooted in a culture of innovation and craftsmanship, Classic Shop China LTD combines advanced manufacturing technology with the expertise of a highly qualified workforce. The organization maintains rigorous quality control at every stage of production – from design and material selection to final inspection and delivery.

From product layout to cutting, the company offers top-notch solutions for both small businesses and large industrial operations. Their comprehensive product range covers rotary dies, accessories machines, lamination glue, ink, stitching wire, flat dies, and laser cutters – making them a truly one-stop destination for packaging and die-cutting requirements.

What Sets Us Apart

Classic Shop China LTD stands at the intersection of technical excellence and customer-centric service. With deep manufacturing expertise and a commitment to precision, the company delivers customized rotary die solutions tailored to the unique operational demands of diverse industries. Their efficient production systems, quality-first approach, and responsive after-sales support have made them the preferred choice for clients worldwide.

Our Core Values

Integrity

Integrity and transparency are the core foundations of our business, fostering long-term trust with our clients.

Quality Excellence

We never compromise on precision, ensuring flawless finishing and the highest standards in our die-cutting technology.

Customer-Centric Approach

Our clients' unique needs and ultimate satisfaction are the primary driving forces behind everything we do.

Innovation & Growth

We continuously adapt to evolving market trends by introducing innovative designs and advanced techniques in die-cutting.

Reliability & Accountability

We have established ourselves as a trusted partner by consistently delivering flawless products on time, every time.

Teamwork & Collaboration

The combined expertise of our skilled designers and technicians is the ultimate strength behind our flawless execution.

Our Vision

To be the global benchmark in rotary die manufacturing — delivering advanced, customizable, high-precision solutions that empower industries worldwide.

Key Objectives:

- Leverage advanced technology to perform multiple functions.
- Offer customization options tailored to specific client needs.
- Support high-precision and high-volume production environments.
- Contribute to the growth of local manufacturing industries.

Our Mission

To provide our clients with the most versatile, durable, and efficient rotary die solutions — enabling them to optimize operations, reduce downtime, and maximize production output

Key Objectives:

- Deliver versatile rotary die cutters for any production scale.
- Offer flexible solutions for both small and large setups.
- Help businesses optimize die-cutting processes.
- Continuously improve efficiency and production output.

Classic Shop China LTD manufactures a comprehensive range of industrial die-cutting and packaging products, each engineered to the highest standards for performance, durability, and precision. Our product portfolio is designed to meet the diverse needs of global industries.

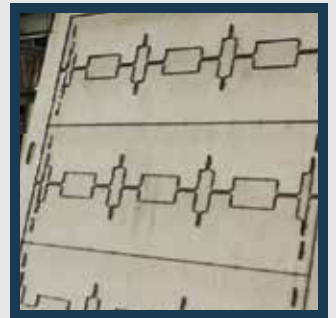

▶ Rotary Dies

The flagship product of Classic Shop China LTD — precision-engineered rotary dies available in steel rule, solid, and combination configurations. Designed for high-speed, high-volume cutting of packaging, labels, and specialty materials with exceptional accuracy and longevity.

▶ Flat Dies

The flagship product of Classic Shop China LTD — precision-engineered flat dies available in steel rule, solid, and combination configurations. Designed for high-speed, high-volume cutting of packaging, labels, and specialty materials with exceptional accuracy and longevity.

▶ Laser Cutters

High-precision flat dies for applications requiring exact cut shapes and dimensions. Ideal for lower-volume specialized cutting operations, custom packaging designs, and prototype development across various substrate types.

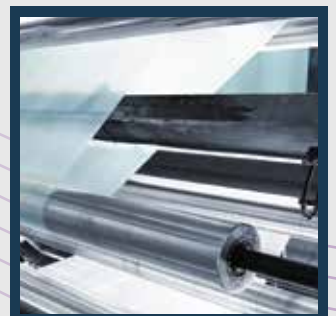

▶ Accessories Machines

A full range of supporting machinery and accessories to complement the die-cutting process — enhancing workflow efficiency, reducing setup times, and ensuring consistent output quality throughout production.

▶ Lamination Glue

Industrial-grade lamination adhesives formulated for strong, durable bonds on paper, film, foil, and composite packaging materials. Available in various formulations to suit different substrates and application methods.

Classicrotary Die manufactures a comprehensive range of industrial die-cutting and packaging products, each engineered to the highest standards for performance, durability, and precision. Our product portfolio is designed to meet the diverse needs of global industries.

▶ Printing Inks

High-performance printing inks compatible with flexographic and rotary printing systems. Formulated for vivid color reproduction, fast drying, and superior adhesion on packaging and label substrates.

▶ Stitching Wire

Premium-quality stitching wire for binding, stapling, and packaging applications. Available in various gauges and materials to meet the specific requirements of different production environments.

Our Services

At Classic Shop China LTD, we offer an end-to-end range of professional services designed to support every stage of your die-cutting and packaging requirements. From initial consultation to post-delivery technical support, our team is committed to your success.

◆ Precision Die Cutting

Expert rotary and flat die cutting solutions tailored to your exact industry specifications and production requirements

◆ Custom Die Manufacturing

Fully customized dies designed and manufactured to your precise dimensions, materials, and cutting patterns.

◆ Lamination Solutions

Fully customized dies designed and manufactured to your precise dimensions, materials, and cutting patterns.

◆ Ink & Print Support

Professional printing ink supply and technical support for flexographic and rotary printing applications.

◆ Technical Consultation

Expert guidance on material selection, die configuration, and process optimization for maximum efficiency.

◆ After-Sales Support

Ongoing technical assistance, maintenance services, and performance optimization support post-delivery.

Our Accessories

In addition to our core die manufacturing services, Classic Shop China LTD provides comprehensive packaging accessory solutions for the garment, textile, and consumer goods industries:

1. Anvill Cover
2. Grinding Rotary Die
3. Creasing Knife
4. Rubber Wheel
5. Air Pneumatic Cylinder
6. PLC (With Memory Card and Program)
7. HMI (With Program)
8. Rotary Encoder
9. Proximity Sensor
10. AC Servo Motor

In addition to our core die manufacturing services, Classic Shop China LTD provides comprehensive packaging accessory solutions for the garment, textile, and consumer goods industries:

11. Inverter
12. Motor With Gear Box
13. Printing Roller With Rubber Roller
14. Color House
15. Ink Pump
16. Flexo Ink
17. Block Making Solvent
18. Flexo Printing Feeding Station Pinion
19. Sheet Cutter knife
20. Sheet Cutter Rubber Wheel
21. N.C Cutter Knife
22. N.C Cutter Rubber Wheel
23. N.C Cutter Servo Motor Coupling
24. Flexo Lenth Cutting Knife With Lower Roller Knife
25. B Flute Roller
26. Corrugated Roller
27. Steam Header
28. Glue Tank
29. Gear Box (For Glue Motor)
30. Ikea Glue
31. Suction Pipe Belt
32. Cotton Belt
33. Conveyer Belt
34. SS Belt Laching
35. Propeller Shaft
36. Propeller Shaft Cross Bearing
37. Flangs (Small Size)
38. Flangs (Big Size)
39. Oil Seal

Our Sourcing & Manufacturing Strategy

At Classic Shop China LTD , we bridge the gap between world-class engineering and custom local assembly to deliver high-performance corrugated and packaging machinery. Our operational model is designed to ensure maximum reliability, cost-efficiency, and precision.

► Premium Sourcing from China

We import all our core mechanical components, high-precision knives, automation units (PLC, HMI, Servo systems), and heavy-duty rollers directly from leading manufacturers in China. By sourcing from top-tier global suppliers, we guarantee that every single component—from the smallest proximity sensor to the heaviest corrugated roller—meets international standards of durability and technological excellence.

► Precision Assembly & Fitting in Bangladesh

Once the premium components arrive, our team of highly skilled local engineers and technicians takes over. In our specialized facility in Bangladesh, we handle the complete fitting, structural alignment, electrical wiring, and programming.

Tailored Customization: We assemble the machinery according to the specific floor space and operational requirements of the Bangladeshi garments and packaging industries.

Rigorous Testing: Every machine undergoes multi-level trial runs and quality checks after assembly to ensure seamless synchronization before delivery.

Why This Model Benefits Our Clients

Uncompromised Quality: You get international, high-end machine components at a highly competitive investment.

Ready Spare Parts Support: Since we import and fit these components ourselves, we maintain an extensive inventory of all spares, ensuring zero downtime for your production.

Instant Engineering Support: Our local assembly team is always available for immediate on-site maintenance, troubleshooting, and re-fitting services, eliminating the need to wait for foreign technicians.

Our Partners & Global Clients

Packaging & Printing

Die-cutting solutions for cartons, boxes, labels, and flexible packaging manufacturers worldwide.

Garment & Textile

Accessories and trims die-cutting for Bangladesh's world-leading RMG export industry.

Pharmaceutical

Precision packaging die solutions for blister packs, cartons, and medical device packaging.

Food & Beverage

Food-safe packaging die solutions for cartons, bags, and secondary packaging materials.

Electronics

Specialized die-cutting for protective packaging, foam inserts, and component trays.

Retail & E-Commerce

Custom packaging solutions for branded unboxing experiences and e-commerce fulfillment.

Company in Numbers

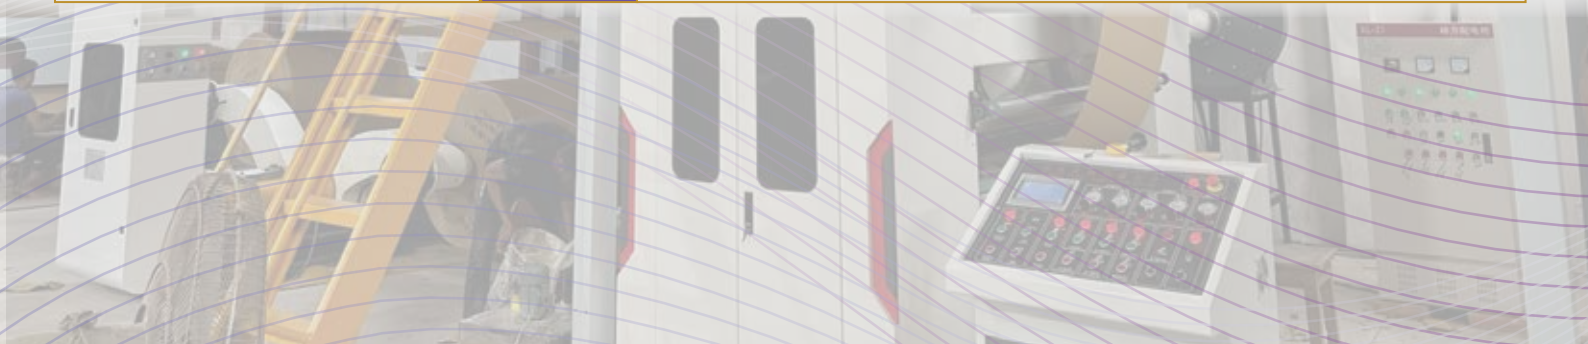

At Classic Shop China LTD, we follow a streamlined, client-focused process engineered for maximum efficiency, transparency, and quality. Every project — from initial inquiry to final delivery — follows our proven five-stage workflow.

Performance Benchmarks

Classic Shop China LTD consistently maintains industry-leading performance metrics across all operational areas, reflecting our commitment to excellence in every aspect of our manufacturing and service delivery.

AREA	SCORE	DESCRIPTION
Factory Experience	95%	Decades of accumulated manufacturing expertise, refined processes, and deep industry knowledge.
Material Quality	97%	Only premium-grade steel, rubber, and specialty alloys sourced from verified suppliers.
Worker Skills	96%	A team of highly trained craftsmen, engineers, and quality control specialists.
Machinery & Equipment	93%	State-of-the-art CNC machining centers, hardening equipment, and precision measurement tools.
On Time Delivery	98%	Stringent production scheduling and logisticsmanagement ensuring commitments are met.

Geographic Reach

Classicrotary Die exports its precision products to clients across South Asia, Southeast Asia, the Middle East, Europe, and the Americas. Our logistics capabilities and export experience ensure seamless delivery to any global destination.

South Asia

Bangladesh, India, Pakistan,
Sri Lanka

Southeast Asia

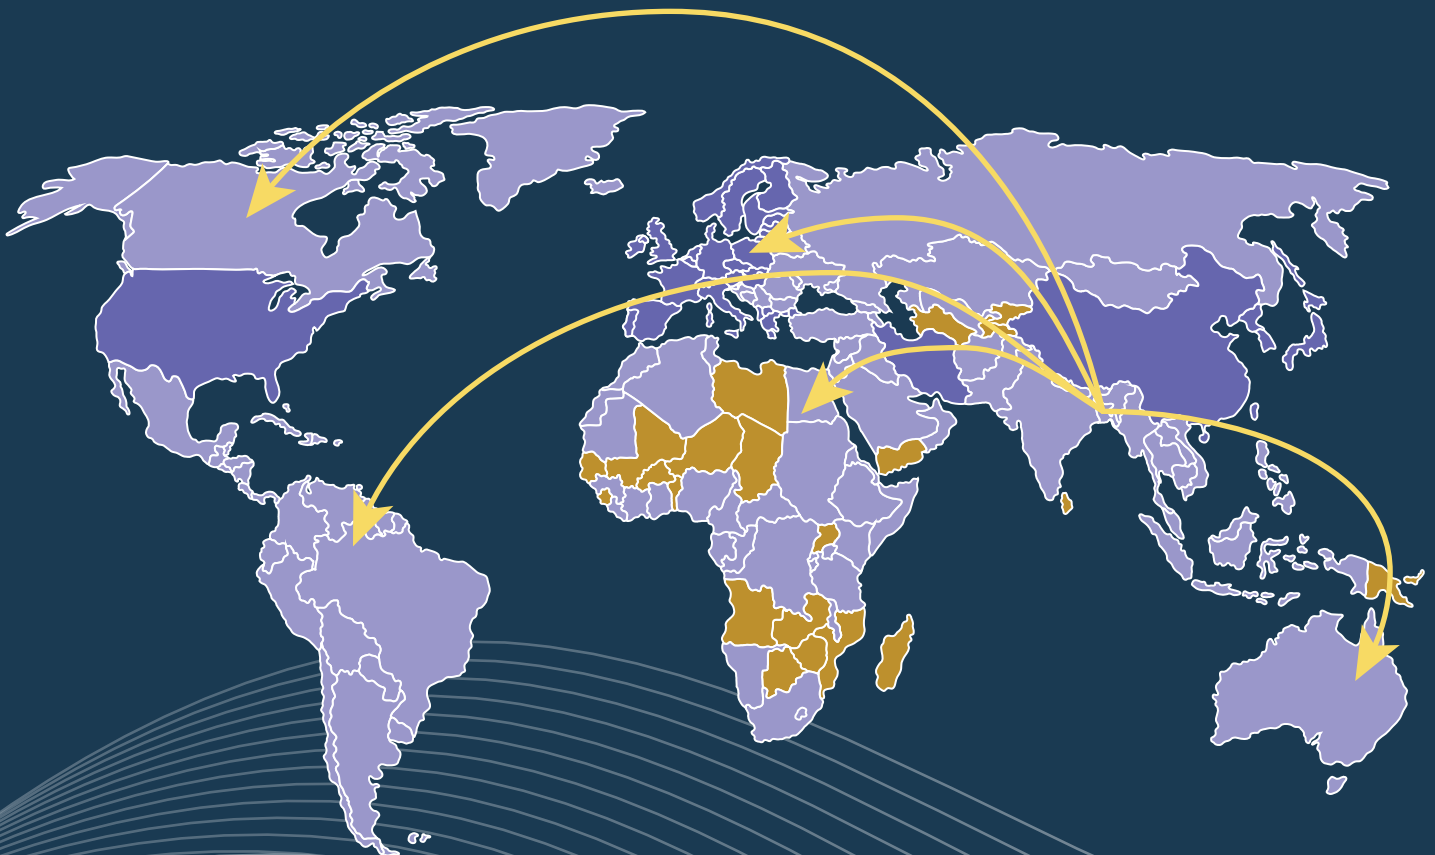

Vietnam, Thailand,
Indonesia, Malaysia

Middle East

UAE, Saudi Arabia, Qatar,
Kuwait

Europe & Americas

UK, Germany, USA,
Canada & more

Why Choose Us

Combining technical excellence with advanced manufacturing technology to deliver world-class precision, unmatched durability, and tailored solutions for global industries.

01

Engineering Excellence & Precision Manufacturing.

02

Premium Quality Assurance (97% Material Benchmark)

03

Complete One-Stop Manufacturing Solution.

04

Fully Customized & Flexible Production.

05

Strong Global Presence & Proven Reliability.

06

On-Time Delivery with End-to-End Support.

07

Robust Multi-Stage Quality Control System.

08

Client-Focused Partnership Approach.

09

Commitment to Quality

How We Work

Our proven step-by-step methodology designed to deliver custom, high-precision solutions tailored to your exact production demands.

01

Inquiry & Requirement Analysis

02

Product Design & Sampling

03

Confirmation & Production

04

Quality Inspection

05

Packaging & Shipping

06

After-Sales Support
